Manual: 8 – Environmental Protection and Compliance

Change Number: 353441

*The current revision can be verified on EDMS.

It is the policy of Fluor, LLC, to conduct the Idaho Cleanup Project (ICP) Core in a safe, compliant and cost-effective manner that protects human health and the environment. We achieve this by integrating environmental requirements and pollution prevention into our work planning and execution and taking actions to minimize the environmental impacts of our operations. We establish and communicate environmental responsibilities, provide environmental training to our workforce, and implement controls to mitigate environmental hazards. Through employee involvement and management commitment to environmental excellence, we will:

- Identify and comply with all applicable environmental laws and regulations.
- Provide full disclosure and openness with the Department of Energy and regulatory agencies regarding any noncompliance with regulatory requirements.
- Use all means practicable to minimize or eliminate any newly generated wastes. Whenever possible, newly generated wastes shall have a clear disposition path before they are generated.
- Protect the unique natural, biological, and cultural resources associated with ICP Core activities.
- Conserve natural resources by reusing and recycling materials, purchasing recycled materials, and using recyclable materials.
- Establish documented environmental objectives and targets and update them as necessary to reflect Fluor Idaho's changing needs, missions, and goals.
- Consider the input of our stakeholders when weighing alternative courses of action.
- Measure our environmental performance and monitor our impact on the environment and communicate the results to our employees, subcontractors, and stakeholders.
- Continuously improve our environmental management system through self-assessment and corrective action.
- Communicate this policy to all employees and subcontractors and make it available to the public and our stakeholders.

This policy applies to all persons working on behalf of the ICP Core. Every employee and subcontractor is expected to follow this policy and to report environmental concerns to management. Managers shall promote environmental stewardship, take prompt action to address concerns and issues and have zero tolerance for noncompliance.
