

RADIOLOGICAL CONTROL REQUIREMENTS FOR ICP SUBCONTRACTORS			Identifier: PRD-3001 Revision*: 7 Page: 1 of 1
Subcontractors	Program Requirements Document	For Additional Info: http://EDMS	Effective Date: 05/06/19 Change Number: <u>362677</u>

Manual: Subcontractor Requirements

*The current revision can be verified on EDMS.

1. INTRODUCTION

1.1 Purpose

This document provides legal, regulatory, and procedural requirements for subcontractors to follow when working in radiologically controlled areas. Any applicable regulatory or ICP requirements must be followed, with the most stringent requirement being met.

1.2 Scope and Applicability

This document contains the hierarchy of site procedures that apply to all subcontracts working at the ICP in radiologically controlled areas, as specified in their contract with the ICP.

2. REQUIREMENTS

2.1 10 CFR 835 Occupational Radiation Protection

This document is the primary legal document controlling the work that is performed in radiological areas at DOE sites.

2.2 The ICP Radiological Control Manual

The ICP Radiological Control Manual, PRD-183, is the site-wide manual containing regulatory requirements for work in radiological areas at this site.

2.3 ICP Radiation Protection Manuals

Manual 15B – Radiation Protection Procedures, TOC-76, and Manual 15C – Radiological Control Procedures, TOC-5, contain procedures that control the work at the ICP in radiological areas.
